

SUMMARY

FP&A leader with 10+ years in budgeting, forecasting and financial reporting. I lead the corporate revenue forecast for a \$4B product portfolio, driven by volume, price, and product and channel mix, and combine finance judgment with hands-on analytics: I build the model, the data pipeline and the executive story. Trusted advisor to executive leadership on scenarios, risks and opportunities, with a track record of modernizing FP&A through automation, BI and machine learning.

CORE COMPETENCIES

Planning & budgeting: annual budget, quarterly forecasts, multi-year plans, P&L scenario modeling

Business partnering: executive reporting, variance commentary, Finance–Sales–Operations–IT alignment

Systems & tools: Excel, Power BI (DAX, M, SVG/IBCS), SAP Analytics Cloud, SQL (Teradata), Python, R, AWS

Revenue analytics: price/volume/mix variance, demand forecasting, risk and opportunity tracking

AI/ML & automation: predictive and ML forecasting, ETL design, VBA and Power Platform automation

Leadership: team leadership, mentoring, change management, finance transformation

EXPERIENCE

Canada Post Corporation · Toronto, ON

2022–Present

Manager, Financial Data Analytics and Reporting

- **Corporate forecast:** Lead a forecasting team (three staff) and oversee forecasting across six staff. Deliver the corporate revenue forecast for a \$4B portfolio across all products: quarterly forecasts, the annual budget and the multi-year plan.
- **Revenue drivers:** Break down results into volume, price and product and channel mix; explain variance to plan to executive leadership each month.
- **Scenarios & risk:** Build revenue and P&L scenarios with risk-and-opportunity views that inform executive decisions on pricing, sales strategy and customer analytics.
- **Reporting transformation:** Lead the move of forecasting and reporting to SAP Analytics Cloud and Power BI as the link between Finance and IT. Cut period-end analytics preparation from two staff over three days to one staff in two hours (over 95% less effort).
- **Advanced analytics:** Brought predictive and machine-learning models into the volume-demand forecast, blended with business judgment. The forecast miss is about 85% smaller.
- **Data & tooling:** Built an IBCS-compliant SVG visual library in Power BI, replacing a paid third-party visuals licence and reducing vendor risk. Resolved a 10-year-old revenue logic gap and re-engineered ETL, saving 200+ hours a year.
- **Leadership:** Top performer at every year-end review. Selected by the General Manager to co-lead a quarterly forum for 200+ FP&A professionals on the analytics and reporting roadmap.

Generali Global Health Services · Markham, ON

2015–2022

Manager, Financial Analysis (2020–2022) · Senior Financial Analyst (2017–2020) · Financial Analyst (2015–2017)

- **Planning & reporting:** Owned the forecast and supported the annual budget for \$100M in global operations; reported profitability and variance analysis to the CFO.
- **Process automation:** Automated financial planning models and built Power BI dashboards, cutting reporting cycle time by 40%.
- **Performance culture:** Built a “Daily Insights” dashboard for operational directors that moved the business to real-time, data-backed performance management; trained 50+ colleagues to self-serve.
- **Growth support:** Profitability and business-case analysis for expansion into new jurisdictions and client contracts. Reconciled the P&L to surface over EUR 25M of unallocated costs during a business wind-down.
- **Controls & audit:** Kept reporting in line with IFRS, GDPR and internal controls; worked with external auditors and funding partners.
- **Team development:** Promoted three times in seven years; mentored two financial analysts.

Metrics Administrator

- **KPI reporting:** Built the first consistent KPI scorecards for senior management, delivered quarterly with high data integrity.
- **Automation:** Automated high-volume reporting with VBA, doubling the team's weekly output.
